AIM

STAND UP will give VET teachers the resources they need to understand cyberbullying and how to combat it. It will also make VET students aware of the risks associated with cyberbullying.

OBJECTIVES

- To equip VET educators, professionals, and teachers with the knowledge and skills necessary to comprehend cyberbullying, identify potential victims in the classroom, and work together to combat it.
- To give VET instructors the resources they need to impart to their students the understanding of cyberbullying and its repercussions.
- To give teachers the knowledge and abilities they need to help children who could be at risk for cyberbullying or who may already be experiencing it.
- To enhance social inclusion both within and outside of the classroom and foster the development of a healthy school climate in VET classrooms.
- To encourage the adoption of digital strategy to aid in pedagogical reform in VET.
- Given that COVID-19 has increased incidences of cyberbullying, give instructors and students resources to respond to it.
- To encourage VET educators to pursue ongoing education.
- To encourage the development of VET programs that promote tolerance and a supportive learning environment for both the students and the instructors.

RESULTS

Training curriculum for teachers: Fight against cyberbullying

Student Learning Tools: Say No to Cyberbullying

Mobile app: STAND UP against cyberbullying
